

# CUTESY CUPCAKES

A cupcake ordering site by  
Irina Bejan and Laurel Anderson

# Application

- NodeJS
- Express
- Mongoose
- Bootstrap
- Passport

# Challenges

Understanding NodeJS

Project restructuring

Time management

Mongo

# Critiques

- We really wanted to start on Dynamo DB
- We would have preferred to style the site from scratch
- More time to explore what AWS could do
- We could have scoped down and worked on the high bar items more

# Final Thoughts

There are things we would do differently, but we learned a lot and had fun creating Cutesy Cupcakes!
